

Healthcare CIO Panel: Successful Healthcare IT Leadership Strategies

Panel Moderator: Elliot B. Sloane, PhD, Villanova University

This panel's distinguished guests will discuss their unique personal experiences and perspectives on providing strategic CIO leadership in the challenging healthcare IT environment. Wracked with financial, management, and legal woes, the US healthcare field nonetheless delivers the best healthcare services in the world, and IT resources have a crucial role in fixing the problems that exist. The healthcare IT world has many of the same IT challenges of other fields – 24x7 service support, pervasive distribution of technology, rapid technology changes, and rising customer expectations – along with the unique twist that people's lives often depend on them. If you are new to the field of healthcare IT, you will find this panel informative too, because it will illuminate the challenges that CIO's face as well as the ways in which healthcare is similar to, yet quite different from, other industries. Join us and learn how the healthcare IT professionals are working towards increasing the performance, productivity and safety of the healthcare enterprise.
